

Bhavan Kuchibhotla

Staff Frontend Engineer / Frontend Tech Lead – Web Architecture

+91 8106443911 | bhavanvitu@gmail.com | Bengaluru

[Bhavan Kuchibhotla | LinkedIn](#) | B.E (Information Technology) VIT University 2008-2012

Frontend Tech Lead / Staff Engineer with 11+ years of experience building and scaling web applications from scratch across early-stage startups and SaaS platforms. Expert in JavaScript, React, build tools, and performance tuning, with a strong track record of setting up frontend architecture, CI/CD pipelines, and dev standards that scale with teams. Hands-on with system-level engineering — from Webpack → Vite migrations, S3/CloudFront deployments, to interactive UIs with D3 and React Flow — blending deep technical rigor with clean, user-focused design. Known for influencing technical direction beyond direct ownership, aligning multiple teams around frontend platform decisions, and making tradeoffs that favor long-term system health.

Engineering Highlights:

- Established frontend standards and CI/CD practices adopted across teams as products and organizations scaled.
- Bootstrapped and scaled frontend systems for multiple 0→1 products, including shared React + React Native architecture and modular design systems.
- Led migrations across major stacks (Angular → React, jQuery → React, Webpack → Vite) while preserving production stability.
- Built CI/CD pipelines with GitHub Actions — automated linting, tests, bundle checks, Lighthouse audits, and PR previews.
- Delivered complex data visualizations and graph UIs using D3.js and React Flow for security, discovery, and observability workflows.
- Architected multi-surface apps (Chrome extensions, mobile-first web apps) using shared build pipelines and conditional runtime logic.

Skills

- *JavaScript, TypeScript*
- *React*
- *Frontend Architecture*
- *Performance Optimization*
- *Design Systems*
- *CI/CD & Build Tooling*

Additional Technical Experience:

React Native, Redux, React Query, D3.js, React Flow, Tailwind CSS, Styled Components, Webpack, Vite, Turborepo, GitHub Actions, AWS (S3, CloudFront), Playwright, Jest, Chrome Extension APIs

Experience

xAi Frontend Specialist Tutor

Jan 2026 - Current

Bangalore/Remote

- Evaluate senior frontend engineering candidates through hands-on project reviews and technical assessments.
- Assess React architecture, JavaScript fundamentals, UI system design, performance considerations, and production readiness.

- Provide structured technical feedback on code quality, component design, state management, and frontend best practices.
- Review real-world frontend implementations across AI-driven projects, focusing on clarity, maintainability, and engineering judgment.
- Help calibrate frontend evaluation standards by identifying common strengths, gaps, and patterns across candidate submissions.

Breakout Staff Frontend Engineer – Contract

Jul 2025 - Jan 2026

Bangalore

- Technical owner for frontend architecture of an embedded AI agent deployed across customer websites.
- Designed a blocks-based frontend system to decouple UI composition from product logic.
- Led development of the internal admin platform for configuring agents and workflows.
- Led architectural alignment with product and backend teams to define scalable frontend patterns.

StealthStartup Founding Product Researcher and Engineer

Dec 2024 - Jul 2025

Bangalore

- Partnered with founders to prototype and validate two AI-first product concepts under pre-seed experimentation.
- Built a modular React + Vite application powering a web platform and Chrome sidebar extension.
- Led frontend architecture and UX for an AI-assisted code transformation tool.

SingulrAI Founding Engineer – FrontEnd

Oct 2023 - Dec 2024

Pune, India

- Architected a data-intensive analytics product with dashboards using React Flow and D3.js.
- Established frontend architecture, testing, and linting standards from day one.
- Acted as frontend decision-maker shaping standards adopted as the team scaled.

Spotnana Founding Engineer – Frontend

Jan 2020 - Jul 2023

Bengaluru, India

- Bootstrapped the frontend codebase and evolved architecture from Webpack to Vite + Turborepo.
- Led development of the core Online Booking Tool used across web and mobile.
- Architected shared logic across React and React Native platforms.
- Scaled the frontend team from 3 to 18 engineers, setting standards and mentoring developers.
- Drove frontend architectural alignment across teams and influenced cross-functional technical decisions.

PushEngage Senior Software Engineer – Frontend

Jan 2019 - Jan 2020

Bengaluru, India

- Led migration of a legacy Angular CRM to a React + TypeScript single-page application.
- Owned architecture and delivery of the modernized React + Node.js stack for 1000+ B2B clients.

Freshworks Senior Software Engineer – Frontend

Oct 2016 - Oct 2018

Chennai, India

- Built real-time React UIs for social media monitoring and engagement workflows.
- Developed internal NLP tagging tools used for model training and annotation review.

ClearTax Software Engineer – Frontend

Sep 2015 - Oct 2016

Bengaluru, India

- Refactored legacy UI styles into maintainable SCSS utilities across large production surfaces.
- Contributed to early versions of ClearSave, building responsive React UI.

OYORooms Founding Engineer – Frontend

Jul 2014 - Aug 2015

Gurgaon, India

- Joined as the 3rd engineer to build OYO's Central Reservation System from scratch.
- Designed and launched the first consumer booking experience (search, listings, checkout).

Freelance web development Software Engineer – Frontend

May 2011 - Jul 2014

Tirupati, India

- Delivered custom frontend solutions across multiple client projects.
